1 Introduction & the four roles

The **REUZEit Portal** is a marketplace for new, used, and refurbished laboratory, hospital, and construction equipment. The same portal serves three very different kinds of user, and the features you see depend on the role assigned to your account.

A role is controlled by two switches on your account — **Selling Activated** and **Accounting Activated** — plus an optional **Admin** marker. You can hold more than one role at once; each role unlocks a bucket of features, and the Admin marker widens the scope of whichever bucket you already have.

Role	Who they are	What they can do
Buyer	The default. Everyone starts here.	Browse the public catalog, build a cart, check out, pay, and track their own orders & invoices.
Supplier	A Buyer activated to sell equipment.	List items, publish them to sales channels, schedule pickup requests, and follow items through the sales pipeline.
Reseller	A user whose company resells through the portal.	A company-wide dashboard of customers, quotes, sales orders, invoices, payments, leads, to-dos, and variants.
Admin	An elevation on top of Supplier and/or Reseller.	Widens scope from "items shared with me" to "every item my company owns."

Which role am I? Open **My Account** → **Permissions**. The page shows your current role in a badge and highlights your column in the capability table (reproduced at the end of this guide).

2 Getting started — create an account & log in

Goal: turn an email address into a working portal account. Everyone begins as a Buyer; the Supplier and Reseller features are unlocked later as needed.

1. Open the portal home page and click **Sign Up** (top right).
2. Enter your work email, first name, last name, and choose a password. If you arrived through a Google or Microsoft single sign-on link, these are pre-filled.
3. Submit the form — the portal creates your account and emails a confirmation link.
4. Open the email and click the activation link. You land back on the portal as a logged-in Buyer.

Coming back later Click the user icon at the top right, choose **Login**, and enter your email and password. Forgot it? Use **Forgot password?** in the login popup and follow the emailed link. SSO users sign in with their Google / Microsoft account instead.

The portal home page. The user icon, wishlist, and cart sit at the top-right; the green Shop menu and search bar run across the header.

3 Buyer guide – the shopping experience

Buying is available to **every** logged-in user, whatever their role. This is the core shopping flow: find equipment, pay for it, and have it shipped.

3.1 Browse & search the catalog

1. From the home page, search by keyword in the top bar, or open the **Shop** menu to browse by category, brand, or manufacturer.
2. Use the filters on the left of the listing page (category, brand, condition, price, region) to narrow results, and the sort control to reorder.

The Shop listing page – product grid with category and filter sidebar.

The screenshot displays a product search interface. On the left, there are filter sections for 'Price Filtering' (ranging from \$1.00 to \$1,000,000.00), 'Product Region' (United States, Netherlands, United Kingdom), and 'Product Condition' (New, Turnkey, Excellent, Very Good, Good, Fair, AS-IS, No Class). A 'Warranty' section is also visible. The main area shows six product cards, each with an image, title, condition, price, and an 'Add to cart' button. The products include Siemens air terminals, a Matheson CO2 regulator, and SOC laser head units. On the right, an 'AI-Chat for product search' chatbot is active, with a message from 'REUZEit Bot' and a text input field.

Keyword search results. The same filtering and sorting controls apply.

3.2 Open an item and add it to your cart

1. Click any item to open its full page — photos, condition, price, specifications, and the shipping policy that applies to your address.
2. Click **Add to Cart**. The cart counter at the top-right updates immediately.
3. Optionally click the heart icon to save an item to your **Wishlist** for later.

Description

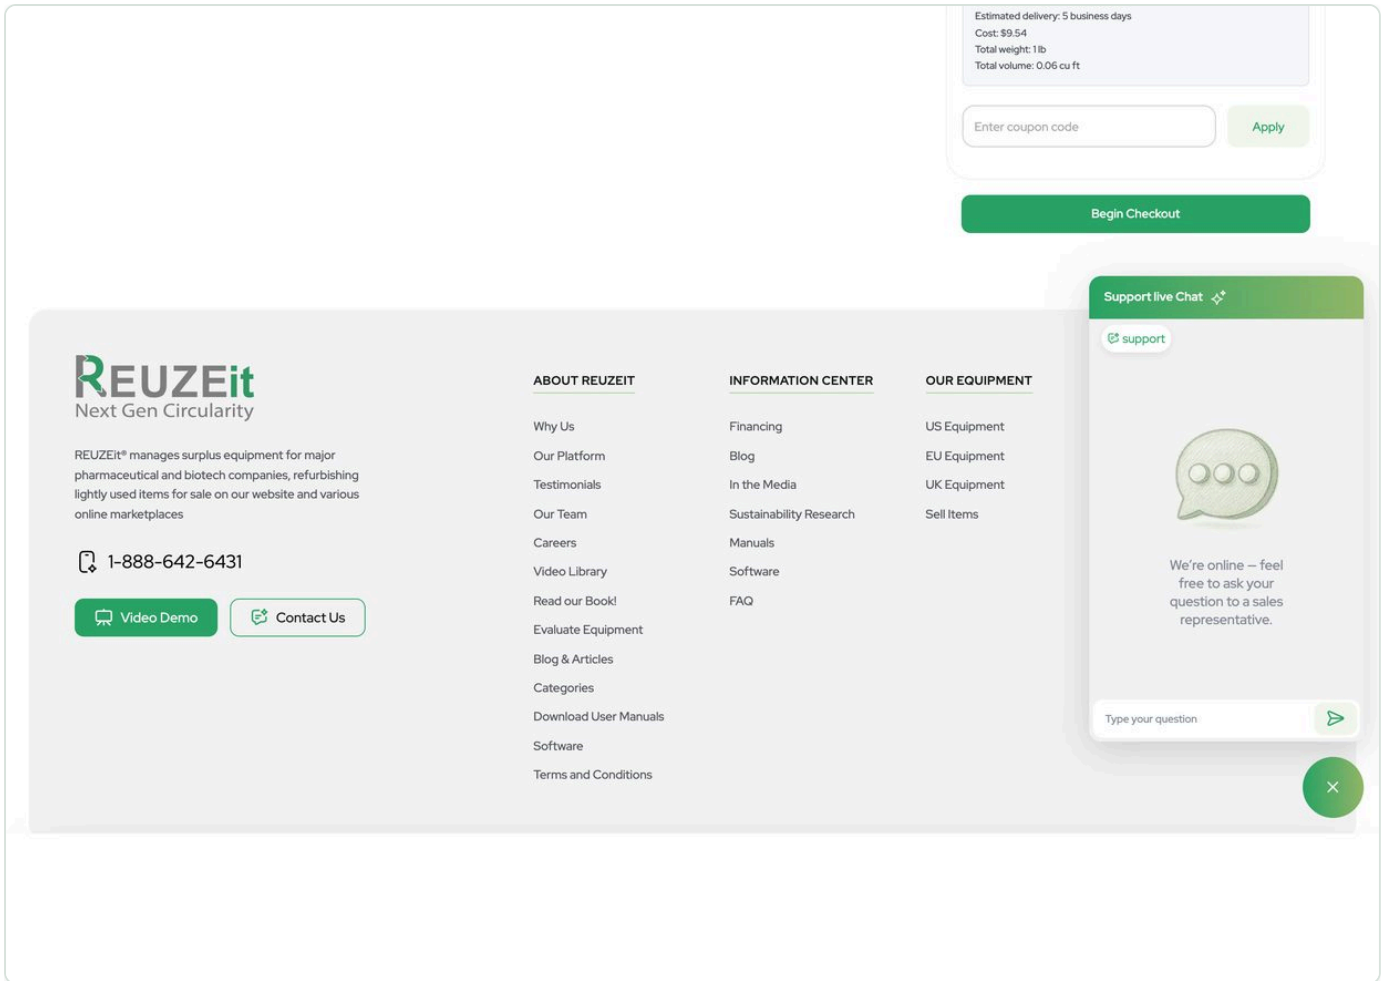

Product Information
The Siemens LGSMX11S14BBBB Laboratory Room Supply Air Terminal, manufactured in 2022, is in excellent unused condition, having been opened only for photography, thus retaining its pristine operational status. Despite minor cosmetic imperfections such as scratches and dents, the unit is unused. Designed for precise environmental control in laboratory settings, this unit ensures reliable air management for optimal conditions in laboratory environments. This unused air terminal demonstrates Siemens' commitment to quality and durability. Please note, no accessories or additional equipment such as power and data cables, computers, or software are included.

Technician comment

An item detail page — image gallery, price, condition, specifications, and the Add to Cart button.

3.3 Check out & pay

1. Open the cart and review quantities and totals, then click **Checkout**.
2. Confirm or add your **shipping address**. If you have none on file, the portal asks for one now.
3. Choose a payment method — credit card via Stripe is the default, and saved cards appear in the dropdown.
4. Click **Pay** and wait for the confirmation screen. The portal creates your order and invoice in the background and emails an order confirmation.

The shopping cart — line items, quantities, totals, and the Checkout button.

Buying on behalf of someone else An order is always tied to whoever is logged in. Ask colleagues to sign in with their own accounts. There is no self-service cancel — contact support, because orders move into the warehouse pipeline within minutes.

3.4 Track your orders

1. Open **My Account** → **My Orders** to see every order *you personally* bought (not your company's orders).
2. Click any order to see line items, totals, status, and tracking once it ships. Invoices live under **My Invoices**.

My Orders — a list of everything you have bought, with status and totals.

4 Supplier guide — list items, publish & pickups

Suppliers are Buyers who have been activated to sell. A Supplier can list equipment, let the portal publish it to sales channels, schedule pickups, and follow items through the pipeline.

Becoming a Supplier Buyers see a **Become Supplier** entry in the top menu. It walks through three steps — confirm your company, enter your warehouse (shipping + billing) address, and confirm your contact details — then flips on **Selling Activated** and replaces the menu entry with **My Equipment**.

4.1 The My Equipment page

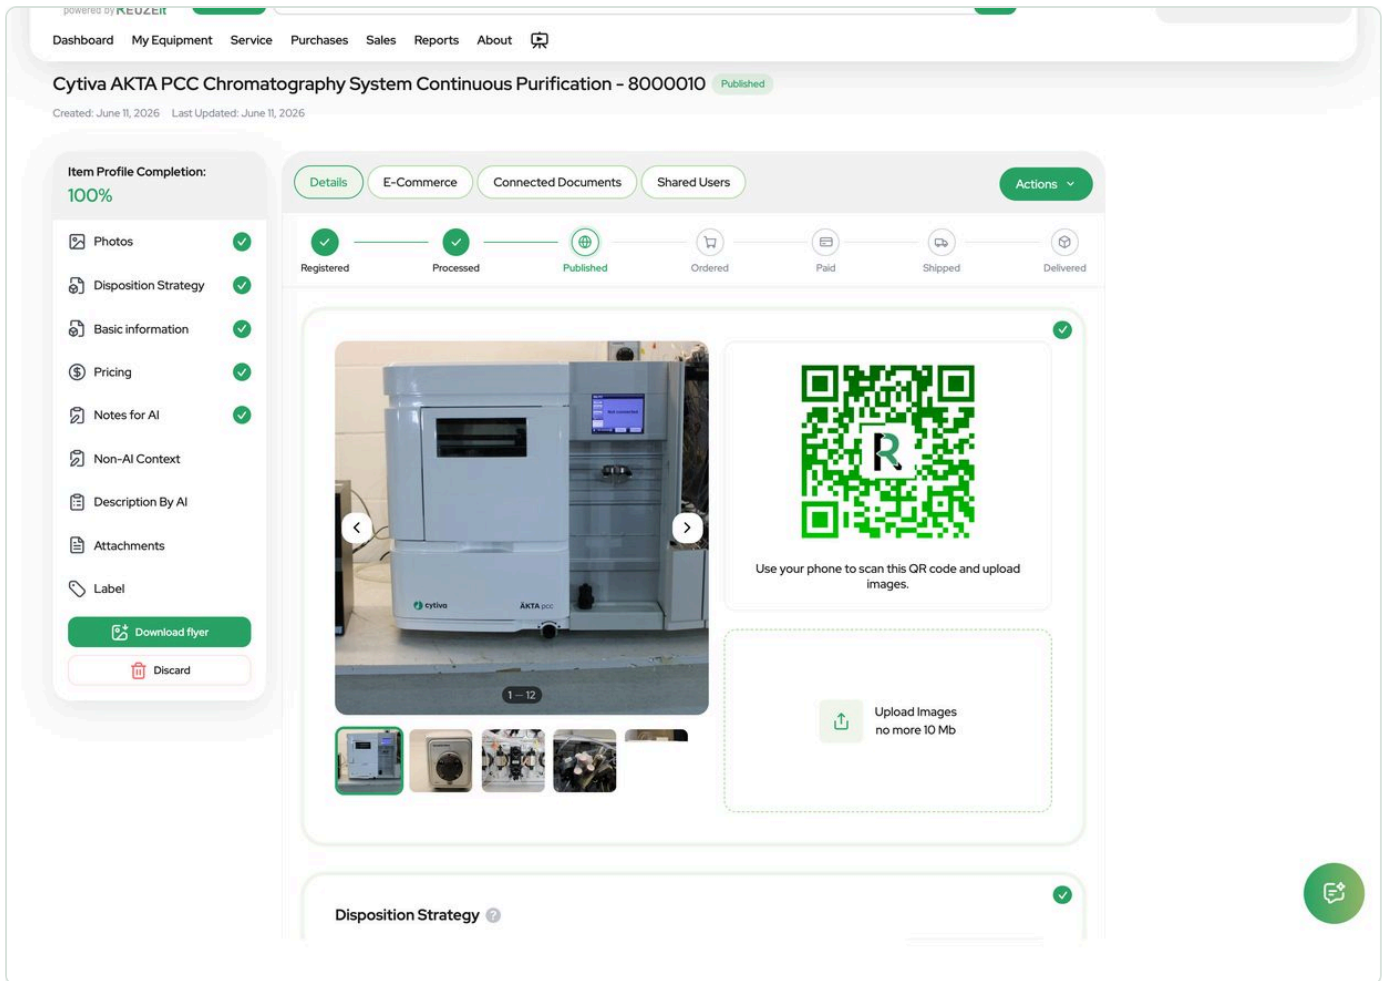

1. Open **My Equipment** from the top menu. Every item you own or that has been shared with you is listed with a completion percentage and a status timeline.
2. Use the filters and search to find a specific item; select checkboxes to act on several at once with the bulk menu.

The screenshot displays the 'My Equipment' interface. At the top, there's a navigation bar with 'Shop' and a search bar. Below the navigation bar, there's a 'My Equipment' section with a progress indicator for three steps: '01 step Add Item(s)', '02 step Choose Disposition Strategy', and '03 step Request Disposition'. The main area is titled 'Add Items' and contains four buttons: 'Add One-by-One', 'Add Scanning Dataplate', 'Add from Table File', and 'Add from Description'. Below these buttons are input fields for 'Make*', 'Model*', and 'Product Condition*' (with a dropdown menu). There are also '+ Add new row' and 'Import products' buttons. The bottom section shows a table of items with columns for 'Serial Number' and 'Product Condition', and a search bar for 'Search by name, brand, model, serial number, barco'. There are also 'Sort By: Latest First', 'Export', and grid/list view icons.

My Equipment — your item inventory with completion bars, status, and bulk actions.

4.2 List a new item

1. Click **+ Add Item** to open a fresh item form (or scan an item's QR code with the mobile app).
2. Fill in the basics — **title, model, brand, and category**.
3. Upload at least one **photo** (drag-and-drop up to 10). The portal makes a thumbnail and a compressed copy automatically.
4. Choose a **disposition strategy** (Sell, Recycle, Donate, ...) and a **target warehouse** where the item currently lives, then **Save**.
5. Watch the completion bar: photos, disposition, basic fields, pricing, and AI notes are 20% each. Keep filling sections until it reads **100%**.
6. At 100% the portal automatically advances the item through the inspection chain and posts it to your enabled sales channels (eBay, the Reuzeit website, etc.).

An equipment item profile — fields, photo gallery, completion bar, and the timeline of its lifecycle.

AI notes Click the magic-wand button next to the description and the portal drafts the AI notes section for you in a few seconds. Hover the completion bar to see exactly which section is still missing.

4.3 The disposition cart

The **Disposition Cart** lets you batch items destined for the same outcome (e.g., a group to publish for sale or to send for recycling) and submit them together. Add items to it from the bulk-action menu in My Equipment, then publish or submit a disposition request for the whole batch in one step.

4.4 Schedule a pickup request

1. From an item (or several selected in My Equipment), click **Schedule Pickup**, or open **Pickup Requests** → **New**.
2. Pick a **requested pickup date** and confirm the **pickup address** (defaults to your linked warehouse).
3. Optionally attach a **decontamination** or **transfer** form (required for some hazardous categories) and add **notes** for the driver.
4. Submit. The portal creates a Pickup Request, assigns you as requestor, and lists it under **Pickup Requests**.

The Pickup Requests list. You always see the requests you created; Supplier Admins see every request for the company.

After pickup The request becomes a project that tracks the item through inspection, listing, sale, and shipment. Need to add more items to a scheduled pickup? Open it and click **Add Items** any time before it is collected.

4.5 Warehouses, source requests & tracking sales

1. Manage the addresses items are picked up from and shipped to under **My Account** → **Warehouse** (Supplier Admins manage the full set under **My Warehouses**).
2. Raise a **Source Request** when you need the portal to find a specific piece of equipment.
3. Follow items you supplied under **My Account** → **Supplier Sales Orders** — a regular Supplier sees orders for items shared with them; a Supplier Admin sees every order for the company.

Source Requests — ask the portal to find equipment you are looking for.

5 Reseller guide — equipment, quotes, orders & CRM

Resellers (Accounting Activated) get a company-wide workspace: a full **My Equipment** catalog, plus customers, quotations, sales orders, invoices, payments, a light CRM of leads and to-dos, and a tool for building product variants — all reached from the **CRM** menu. A regular Reseller sees items and documents shared with them; a **Reseller Admin** sees everything for the company.

5.1 The company dashboard

Open **My Account** → **Company** for the company hub. Each area has its own filters, search, and most-recent-first sort. Drill into any document to see line items, the full contact, related items, and the chain back through the quote, order, invoice, and payments.

The dashboard is titled "NEUZEL Next Gen Circularity" and includes a search bar and navigation tabs for "My Equipment", "Purchases", "CRM", and "About".

Key sections include:

- Asset Recovery:** Shows a value of \$0.
- Landfill Avoidance:** Shows a value of 0 Kg.
- Pickup Calendar:** A calendar for June 2026.
- Action Cards:** Six cards for equipment management: "Pickup my equipment", "Shop for equipment", "Evaluate my equipment", "Help me to source Equipment", "Sell or redeploy my equipment", and "Recycle my equipment".
- Shop Equipment by Categories:** A row of category tiles: Analytical (150 items), Autoclave / Sterilizer (1 item), Bioprocessing (85 items), Bioreactor / Fermenter (72 items), Cell Counting / Sorting (46 items), Centrifugation (201 items), and Chemistry (78 items).
- Data Panels:** Eight panels for "Projects", "Orders", "Disposition Request", "Pickup Request", "Source Request", "Support Request", "My Items", and "My Programs". The "Orders" panel lists several cancelled orders (e.g., SAL-ORD-2026-00863).

The reseller account dashboard — the hub for company customers and documents.

5.2 My Equipment — add & manage your items

The **My Equipment** page (top menu → **My Equipment**) is your inventory of every asset the company is processing for resale. It opens in a card grid; each card is one item, and a click on its **Barcode** opens the full item profile (section 5.3).

The My Equipment page — your inventory in card view, with the four Add buttons, filters, and per-item cards.

Four ways to add an item

The buttons across the top of My Equipment each open a different intake flow — pick whichever fits how much you already know about the item:

Add One-by-One

Register items one row at a time. Enter the **Make**, **Model** and **Condition** and (optionally) attach a product photo, then **Import products**. Best for a handful of items you can describe by hand.

Add Scanning Dataplate

Scan the equipment's **data plate** (the manufacturer label) with your device camera / QR. You pick the **Source Company & Warehouse** and **Target Company & Warehouse**, and the system reads the plate to pre-fill make, model and serial. Best when the asset is in front of you.

Add from Table File

Bulk-import from a spreadsheet. **Download Import Template**, fill it in, and upload the Excel/CSV (up to **25 rows** and 10 MB at a time). Best for a known list of many items.

Add from Description

Paste a free-text description of one or more items into the box and let the AI parse it into structured items (make, model, category...). Best for converting an email or quote text into inventory.

What every item card shows

Each card (and each row in table view) summarises the item and its commercial state at a glance. Using a real example — **Dell WD19TBS Docking Station**, status **Registered**:

Status — lifecycle stage of the asset (here **Registered**) — see the status path in 5.3.

Barcode — the item code (e.g. **1120741983**); click it to open the full profile.

Make — manufacturer, e.g. **Dell**.

Source Co. — company the asset came from, e.g. **Thermo Fisher**.

Location — warehouse / bin code where it physically sits, e.g. **TEST_MP**.

Profile — profile-completion %, e.g. **80%** — drives publishing (see 5.3).

Retail — list / replacement value, e.g. **\$4,000.00**.

E-Commerce — how many sales channels it is currently published on.

Variants — how many upgraded variants have been built from this item.

Created / Updated — when the item was first registered and last edited (e.g. Created May 29, Updated Jun 3).

Category — asset category, e.g. **Computer / IT**.

Model — model number, e.g. **WD19TBS**.

Target Co. — company that now owns / will sell it, e.g. **Reuzeit**.

Qty — quantity on hand for this item, e.g. **1**.

AI Price — the system's suggested resale price, e.g. **\$57.99**.

Sale — the agreed sale price once sold (e.g. **\$0.00** while unsold).

Quotes / Orders / Payments — counts of the quotes, sales orders and payments that reference this item.

Users — how many colleagues the item is shared with (e.g. **5**).

Disposition strategy

Every item carries a **Disposition Strategy** — what you intend to do with it. Set it from the card's dropdown (or in bulk); it drives which downstream flows and channels apply:

Consignment & Redeployment

offer it for resale *and* allow it to be redeployed internally — the broadest option.

Consignment Only

resell it on behalf of the owner; not available for internal redeployment.

Redeploy Only

keep it inside the organisation for reuse; not listed for sale.

Storage

hold the asset — neither sold nor redeployed for now.

To be Donated

earmarked for donation rather than sale.

To be Scrapped

end-of-life; flagged for recycling / disposal.

Local Sale

sell locally / direct rather than through the online channels.

TBD

to be determined — the default until you decide the strategy.

Cytiva AKTA PCC Chromatography System Continuous Purification

Published Created June 11, 2026 Updated June 11, 2026

Barcode 8000010	Category Bioprocessing	Make Cytiva	Model AKTA PCC
Source Co. Thermo Fisher	Target Co. Reuzeit	Location AF-1	Qty 1
Profile 100%	AI Price \$71,250.00	Retail \$200,438.25	Sale \$0.00

E-Commerce 5 Quotes 0 Orders 0 Payments 0 Variants 0 Users 5

Disposition Strategy: **Consignment Only**

View Product Actions

Setting an item's Disposition Strategy from the card dropdown.

Filters & table view

The left sidebar filters the list by **Serial Number**, **Status**, **Target warehouse**, **Current owner**, **Reseller**, **Source company**, **Profile Completion**, **Disposition Type**, **Product Condition**, **Category / Sub-Category**, **Brand**, **Requestor**, **Warranty**, **Location Code**, **Pickup Request**, **Project ID** and more — combine any of them to narrow the grid.

Use the **grid / table** toggle to switch between the card grid and a dense, sortable table. Table view shows the same data as columns — Disposition, Condition, Make, Model, Category, Retail, AI Price, Profile, Status, Serial, Sub-category, Location, Qty, Source/Target Co., Sale, E-Com, Quotes, Orders, Payments, Variants, Shared, Warranty, Requestor, Created and Updated — handy for scanning or exporting many items at once.

5.3 The item profile page

Clicking an item's barcode opens its profile at `/my-equipment-item/<code>` — the full record for one asset, with its photos, every field, its sales channels, its connected documents, and the people it is shared with.

The screenshot displays the ThermoFisher Scientific user interface for an item profile. At the top, there is a navigation bar with a search bar and user account information. Below this, the item title "Cytiva AKTA PCC Chromatography System Continuous Purification - 8000010" is shown with a "Published" status. A progress bar indicates the item's lifecycle stages: Registered, Processed, Published, Ordered, Paid, Shipped, and Delivered. The "Published" stage is currently active. On the left, a sidebar shows "Item Profile Completion: 100%" with a checklist of fields like Photos, Disposition Strategy, Basic information, Pricing, Notes for AI, Non-AI Context, Description By AI, Attachments, and Label, all marked as complete. The main content area features a large photo of the equipment, a QR code for scanning, and an "Upload Images" section with a "no more 10 Mb" limit. A "Download flyer" button and a "Discard" button are also visible in the sidebar.

An item profile — the header shows the title, status, Item Profile Completion, and the Actions menu.

Item Profile Completion — and why 100% matters

The header shows **Item Profile Completion: 80%** (for example). The percentage measures how much of the item's required data is filled in — make, model, category, condition, images, price, warehouse, and so on. Each missing field keeps you below 100%.

Aim for 100% When an item reaches **100%**, the system automatically advances it to **Processed** — meaning it is complete and ready to go to market. From there it can be **Published** to your sales channels in a single click. So the goal for every item is always 100%: a fully-completed profile is the gate to one-click publishing.

The status then moves along this path as the item progresses:

Registered → Processed → Published → Ordered → Paid → Shipped → Delivered

The four tabs

Details

the item's full profile — title, make, model, category, condition, justification, pricing, warehouse, images and every other field. This is where you fill in what is missing to reach 100%.

E-Commerce

the sales-channel view — which channels the item is published on and its listing details / status per channel.

Connected Documents

every document linked to this item (quotes, orders, invoices, payments, quality inspections, pickup requests, variants) — see below.

Shared Users

who can see or edit this item. Each user shows a green **Yes** / grey **No** pill for View and Edit; use **+ Add User** to share (section 6).

The screenshot shows the 'Details' tab of an item profile in the ThermoFisher Scientific REUZEit system. The page is titled 'Item Profile Completion: 100%' and features a sidebar with a checklist of completion items, all of which are marked with green checkmarks. The main content area is divided into several sections: a large photo of the Cytiva AKTA PCC Chromatography System, a QR code for mobile scanning, an 'Upload Images' section with a 10 Mb limit, a 'Disposition Strategy' section set to 'Consignment Only', and a 'Product Info' section with an AI-generated title and a 'Lock title' option. The top navigation bar includes a search bar, currency selector (\$USD), and user profile icons. A green chat icon is visible in the bottom right corner.

9 channels · 3 intervals

E-Commerce tab — which channels the item is published on and its per-channel status.

The Actions menu

The **Actions** button (top-right of the profile) gathers the things you can do to the item, depending on its state and your permissions:

Mark as Processed

advance the item to Processed (available once the profile is complete).

Mark as Published

publish the item to your sales channels (disabled once already published).

Create Variant

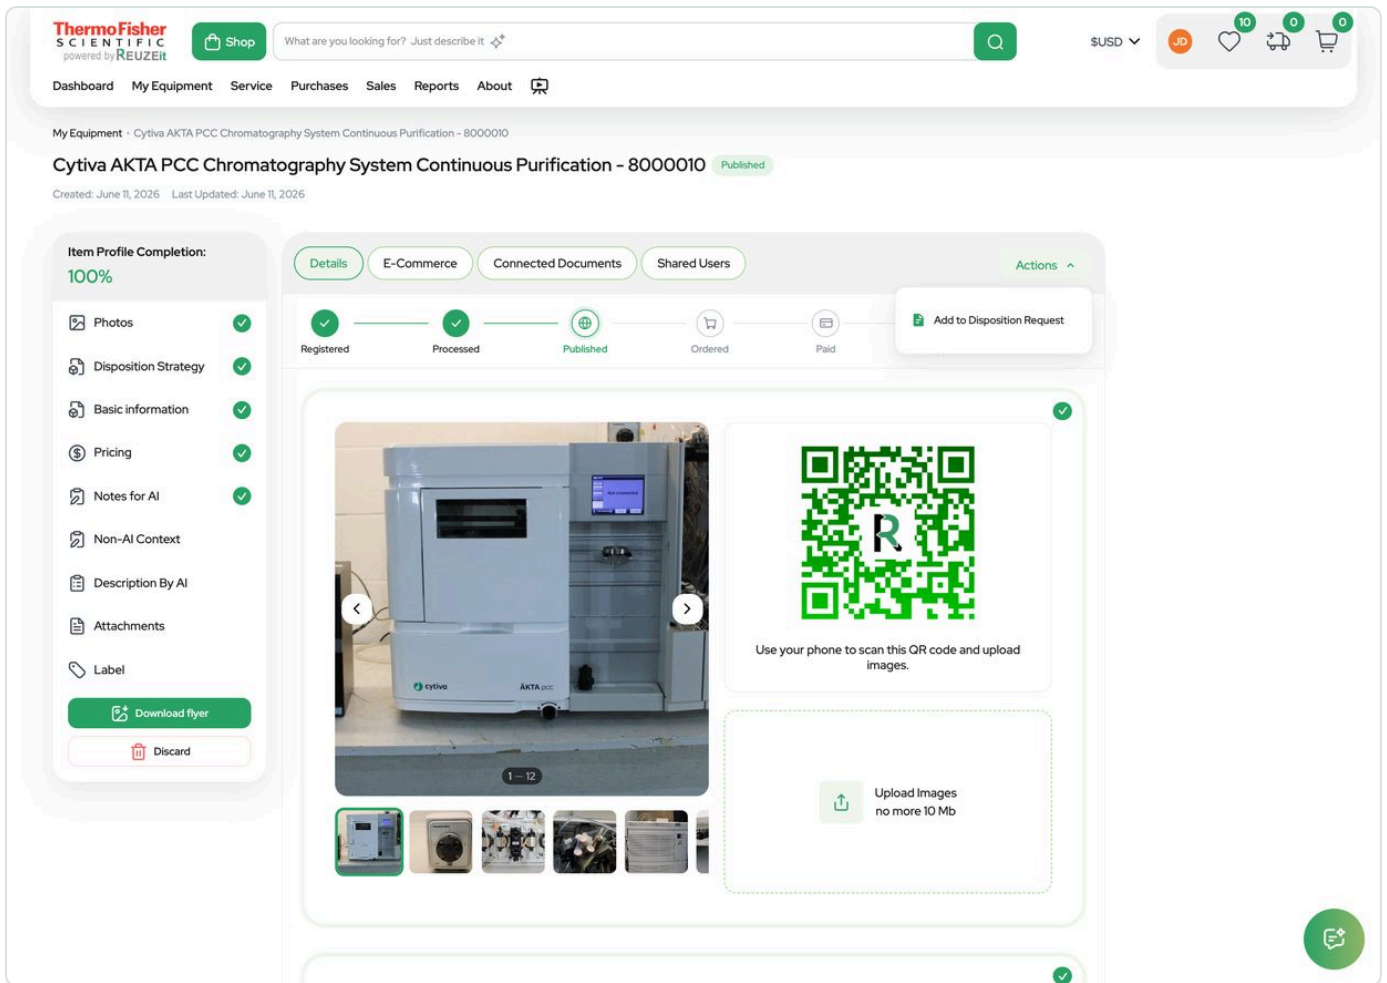

build an upgraded variant of this item (see My Variants in 5.4).

Add to Quote

drop the item onto a new or existing quotation for a customer.

Add to Disposition Cart

send it to the disposition cart for a pickup / disposal flow.

The Actions menu — Mark as Processed / Published, Create Variant, and add-to-quote / disposition actions.

Connected Documents

The **Connected Documents** tab lists everything generated around this item, grouped by type. Empty groups read “**No records found**”; a **+** next to a heading lets you create that document for the item directly. Which groups appear depends on the item and your role — an accounting-owned item shows the full set below:

Quotations

quotes that include this item. **+** starts a new quote pre-loaded with it.

Orders

sales orders that include the item, with their status.

Invoices

sales invoices raised for the item and their balance.

Payments

payments received against those invoices. **+** records a payment.

Quality Inspections

QC inspections performed on the item through its lifecycle.

Pickup Requests

pickup requests this item was part of.

Variants

variants built from this item, e.g. **ITM-VAR-00000004 — Registered**. **+** creates one.

5.4 The CRM menu

The **CRM** menu in the top navigation is the reseller's command centre — every sales and customer document lives under it. Its submenus:

Quotes

create and track quotations to customers.

Orders

confirmed sales orders.

Invoices

issued sales invoices and balances.

Payments

payments received against invoices.

Quality Inspections

QC inspection records for items.

Leads

a light CRM of prospective deals.

ToDos

follow-up tasks and reminders.

My Variants

upgraded variants you have built from items.

Customers

your company's customer book.

Conversations

message threads with customers / on items.

Customers

1. Open **CRM** → **Customers** to see every customer your company has worked with.
2. Filter and search to find one; click through to a profile with addresses and full document history.
3. Add a new customer with **+ Add Customer**, or edit contacts and addresses from the customer page.

Creating a new quote — choose the customer and add line items, quantities, prices, and discounts.

A quote detail page — line items, totals, customer, and the submit / generate-order / mark-as-lost actions.

Who can edit a quote? You can edit a quote when you have **edit** access to one of its items, or you are a company Admin. View-only access lets you open the quote but the edit buttons stay disabled.

Orders, Invoices & Payments

1. **Orders** lists confirmed sales orders generated from quotes or placed directly; drill in for line items, ship-by date, and tracking.
2. **Invoices** shows issued invoices and their outstanding balance.
3. **Payments** shows payments received against invoices. Every document cross-links back through the chain that produced it.

Quality Inspections

CRM → **Quality Inspections** lists the QC inspection records captured as items move through their lifecycle (arrival, processing, pre-shipment). Each shows the item, inspection type, result and date — the same records that also appear under an item's Connected Documents.

Leads — a light CRM of prospective deals with status and filters.

The screenshot displays a CRM interface with a sidebar on the left and a main content area on the right. The sidebar contains filters for task status (Cancelled (5), Closed (8), Open (3)), priority (Medium (16)), type (Marketplace Enquiry (3), Marketplace Offer (9), Marketplace Variant Price Adjustment Request (3), ToDo (1)), and allocated to (jonah.shell@reuzeit.com (7), mike.semenov@reuzeit.com (3)).

The main content area shows a list of tasks, each with a status, priority, and due date. The tasks are:

- Inquiry form submitted for item - BB3374803**: Closed, Medium, Jun 13, 2026. Company Name: Axe Lab. Message: Hello, I see the listing mentions this unit does not come with the power cord, is this correct? I believe these units have a power cord on the back that is not removable from the actual unit. How can I submit an offer for this unit and do a local pick up? What would shipping cost to send this unit to Van Nuys, CA 91406 if I decide not to drive down to do a p/u? I know the unit isn't very big and they don't weigh very much, so I am curious if it would be worth the 3 hours R/T drive plus fuel cost for me to do a will-call p/u. Thanks. -Ryan. Assigned: jonah.shell@reuzeit.com. Lead: CRM-LEAD-2026-01843.
- Make Offer submitted for item - 3420826710**: Closed, Medium, Jun 11, 2026. Company Name: ARL BioPharma. Message: Product Name: Distek Evolution 4300 Dissolution Tester for Pharmaceutical Applications. Product SKU: 3420826710. Offer Price: \$2,300.00. Assigned: jonah.shell@reuzeit.com. Lead: CRM-LEAD-2026-01813.
- Make Offer submitted for item - BB3374614**: Closed, Medium, Jun 05, 2026. Company Name: Aaaa. Message: MIDEA WHS-109FBI UPRIGHT FREEZER for Cold Storage Applications. Product SKU: BB3374614. Offer Price: \$43.00. Assigned: jonah.shell@reuzeit.com. Lead: CRM-LEAD-2026-01751.
- Inquiry form submitted for item - BB3362466**: Closed, Medium, Jun 05, 2026. Company Name: Archer Bio Labs LLC. Message: Could I get a quote for shipping this to El Dorado Hills, CA 95673? Trying to see if this is financially doable with how expensive shipping and gas is currently. Assigned: jonah.shell@reuzeit.com. Lead: CRM-LEAD-2026-01753.
- Inquiry form submitted for item - BB3363025**: Closed, Medium, Jun 04, 2026.

ToDos — follow-up tasks with status, comments, and filtering.

My Variants

CRM → **My Variants** lists the upgraded variants you have built from existing items — add expenses, set the configuration, and request a price adjustment. A variant carries its own code (e.g. **ITM-VAR-00000004**) and links back to the source item.

My Variants — upgraded versions of items, with added expenses and price-adjustment requests.

Conversations

CRM → **Conversations** collects the message threads tied to your customers and items, so the back-and-forth around a deal stays in one place.

6 Sharing items with colleagues

Sharing lets another person at your company see — or edit — a specific item. It is the mechanism that controls which orders, quotes, and invoices a non-admin colleague can see.

1. Open the item from **My Equipment** and click the **Shared Users** tab. Everyone on the item's list shows a green **Yes** / gray **No** pill in the View and Edit columns.
2. Click **+ Add User**, type their **email**, and optionally add name, phone, and a description.
3. Choose the permission level — **View** (open the item and see related documents) or **Edit** (also modify the item's profile) — then click **Add User**.

Who can grant what Anyone with access to an item can invite a colleague with **View**. Only the item's **owner** or a company **Admin** can grant **Edit** (the checkbox is hidden otherwise). Invites are saved even before the colleague has an account — access is waiting when they sign up. Removing a user requires owner, Admin, or an existing edit-shared user.

7 Your account & profile

1. Open **My Account** → **Account** to edit your name, phone, addresses, and saved payment cards.
2. Click **Change Password**, enter the new password twice, and submit. (SSO users manage passwords with their Google / Microsoft provider, so this section is hidden.)
3. Manage saved cards under **My Account** → **Cards** — hover a card and click the trash icon to remove it.

Changing your email Your email is the identity of the account and cannot be changed yourself — contact support to migrate to a new email.
